Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3/10/10 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 1-5 and 7** are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 59-16702 in view of Welner 4,205,572. JP 59-16702 discloses a circular saw having the claimed elements that include a housing, a motor a saw blade; and the depth of the of a cut may be adjusted by manipulating the footplate that swivels relative to the saw assembly; and wherein the handle is fixed directly to the footplate. JP 59-16702 does not specifically disclose decoupling the assembly from handling forces that act on the

saw blade. Weiner discloses a saw blade retainer and kickback clutch assembly that decouples the forces that act on the saw blade so as to preclude the occurrence of damage to the tool and operator. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the JP 59-16702 apparatus to have a retainer and kickback clutch assembly that decouples the forces that act on the saw blade as taught by Weiner so as to preclude the occurrence of damage to the tool and operator.

Claims 6 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 59-16702 in view of Welner and in further view of Smith 7,255,144.

JP 59-16702 as modified is described above. The modified JP 59-16702 does not disclose a ball and detent to isolate the vibration forces. Smith discloses an apparatus that implements a ball and detent configuration to isolate vibration forces in order to maximize the efficiency of the cutting operation. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the apparatus of the modified JP 59-16702 to implement a ball and detent configuration to isolate vibration forces in order to maximize the efficiency of the cutting operation.
